

### **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Listing of Claims:**

Claim 1 (currently amended): An electronic device, comprising:

a display, wherein an image is displayable on said display; and  
a navigation sensor, whereby a movement of said electronic device relative to a surface in close proximity to said navigation sensor is sensed by said navigation sensor and said movement includes moving said display and said movement produces a change in said image that is showing on said display [[.]] ; and  
a first button, whereby said movement of said electronic device and said first button may be operated in cooperation to mimic at least one function of a computer mouse being used with a graphical user interface.

Claim 2 (original): The electronic device of claim 1 wherein said change comprises at least moving a cursor.

Claim 3 (original): The electronic device of claim 1 wherein said change comprises at least panning at least part of said image that is showing on said display.

Claim 4 (original): The electronic device of claim 1 wherein said change comprises at least scrolling at least part of said image that is showing on said display.

Claim 5 (original): The electronic device of claim 1 wherein said change comprises at least navigating at least part of said image that is showing on said display.

Claim 6 (cancelled)

Claim 7 (currently amended): The electronic device of claim 1 [[6]] further comprising:  
a second button, whereby said movement of said electronic device, said first button, and said second button may be operated in cooperation to mimic more than one function of a computer mouse being used with a graphical user interface.

Claim 8 (currently amended): An electronic device, comprising:  
a display;  
a navigation sensor coupled to said display whereby said navigation sensor detects a movement of said electronic device relative to a surface in close proximity to said navigation sensor and said movement includes movement of said display and an image displayed on said display is altered in response to said movement [[.]] and:  
a first button, whereby said movement of said electronic device and said first button may be operated in cooperation to mimic at least one function of a computer mouse being used with a graphical user interface.

Claim 9 (original): The electronic device of claim 8 wherein said image displayed on said display is altered in response to said movement by moving an image of a cursor.

Claim 10 (original): The electronic device of claim 8 wherein said image displayed on said display is altered in response to said movement by panning a second image displayed on at least part of said display.

Claim 11 (original): The electronic device of claim 8 wherein said image displayed on said display is altered in response to said movement by scrolling a second image displayed on at least part of said display.

Claim 12 (original): The electronic device of claim 8 wherein said image displayed on said display is altered in response to said movement by showing a different part of a second image part of which is displayed on at least part of said display.

Claim 13 (cancelled):

Claim 14 (currently amended): The electronic device of claim 8 [[13]] wherein a graphical user interface is being displayed on said display.

Claim 15 (currently amended): The electronic device of claim 8 [[13]] further comprising:

a second button, whereby said movement of said electronic device, said first button, and said second button may be operated in cooperation to mimic more than one function of a computer mouse being used with a graphical user interface.

Claim 16 (original): The electronic device of claim 15 wherein a graphical user interface is being displayed on said display.

Claims 17-26 (cancelled)

Claim 27 (original): An electronic scanning device, comprising

an image sensor for scanning an image;  
a display that displays a first part of a scanned version of said image,  
a navigation sensor that detects relative movement between said scanning device and a surface in close proximity to said navigation sensor whereby said relative movement changes said display to displaying a second part of said scanned version of said image.

Claim 28 (original): The electronic scanning device of claim 27 wherein said relative movement may also move a cursor displayed on said display.

Claim 29 (original): The electronic scanning device of claim 27 wherein said second part of said scanned version of said image is a scrolled in relation to said first part of said scanned version of said image.

Claim 30 (original): The electronic scanning device of claim 27 wherein said second part of said scanned version of said image is a panned in relation to said first part of said scanned version of said image.

Claim 31 (original): The electronic scanning device of claim 27 wherein said second part of said scanned version of said image is displaced in two directions in relation to said first part of said scanned version of said image.

Claims 32-56 (cancelled)
